

### Basic Installation Guidelines

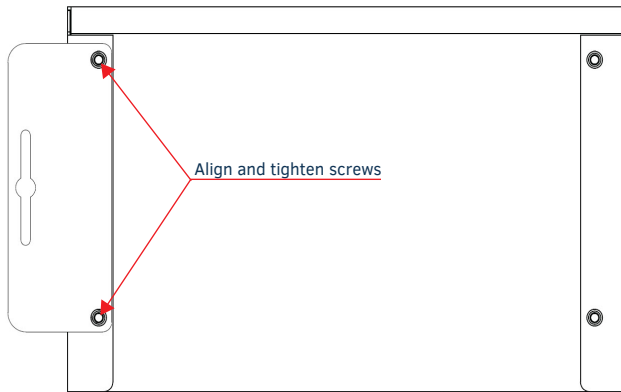

The NMX-ACC-N9101 Mounting Wings are used to mount N-Series SVSI Encoders, Decoders, and Audio Transceivers to a surface or wall. Follow these instructions for proper installation.

1. Remove two screws from the bottom of the unit you wish to mount. The two screws you remove should be on the same side of the unit (as shown below).

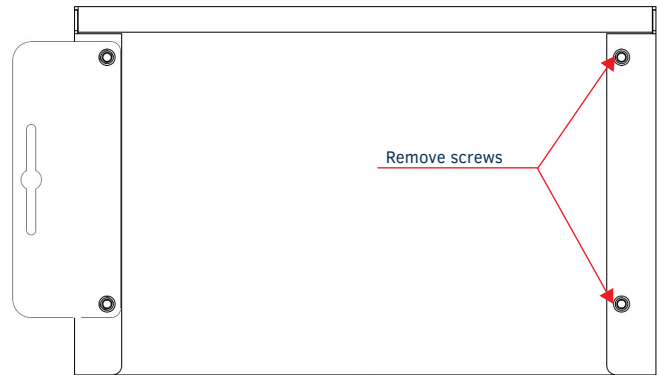

**CAUTION: Do not remove all four screws at once.**

2. Align and secure the first mounting wing to the bottom of the unit, using the same two screws you just removed. Make sure the screws are tightened properly.

3. Remove the remaining two screws.

4. Align and secure the second mounting wing to the bottom of unit, using the same two screws you just removed. Make sure the screws are tightened properly.

Please contact SVSI technical support at [svsisupport@harman.com](mailto:svsisupport@harman.com) or 256.461.7143 x9900 for any installation issues.
